RNE CORRIDOR

C04

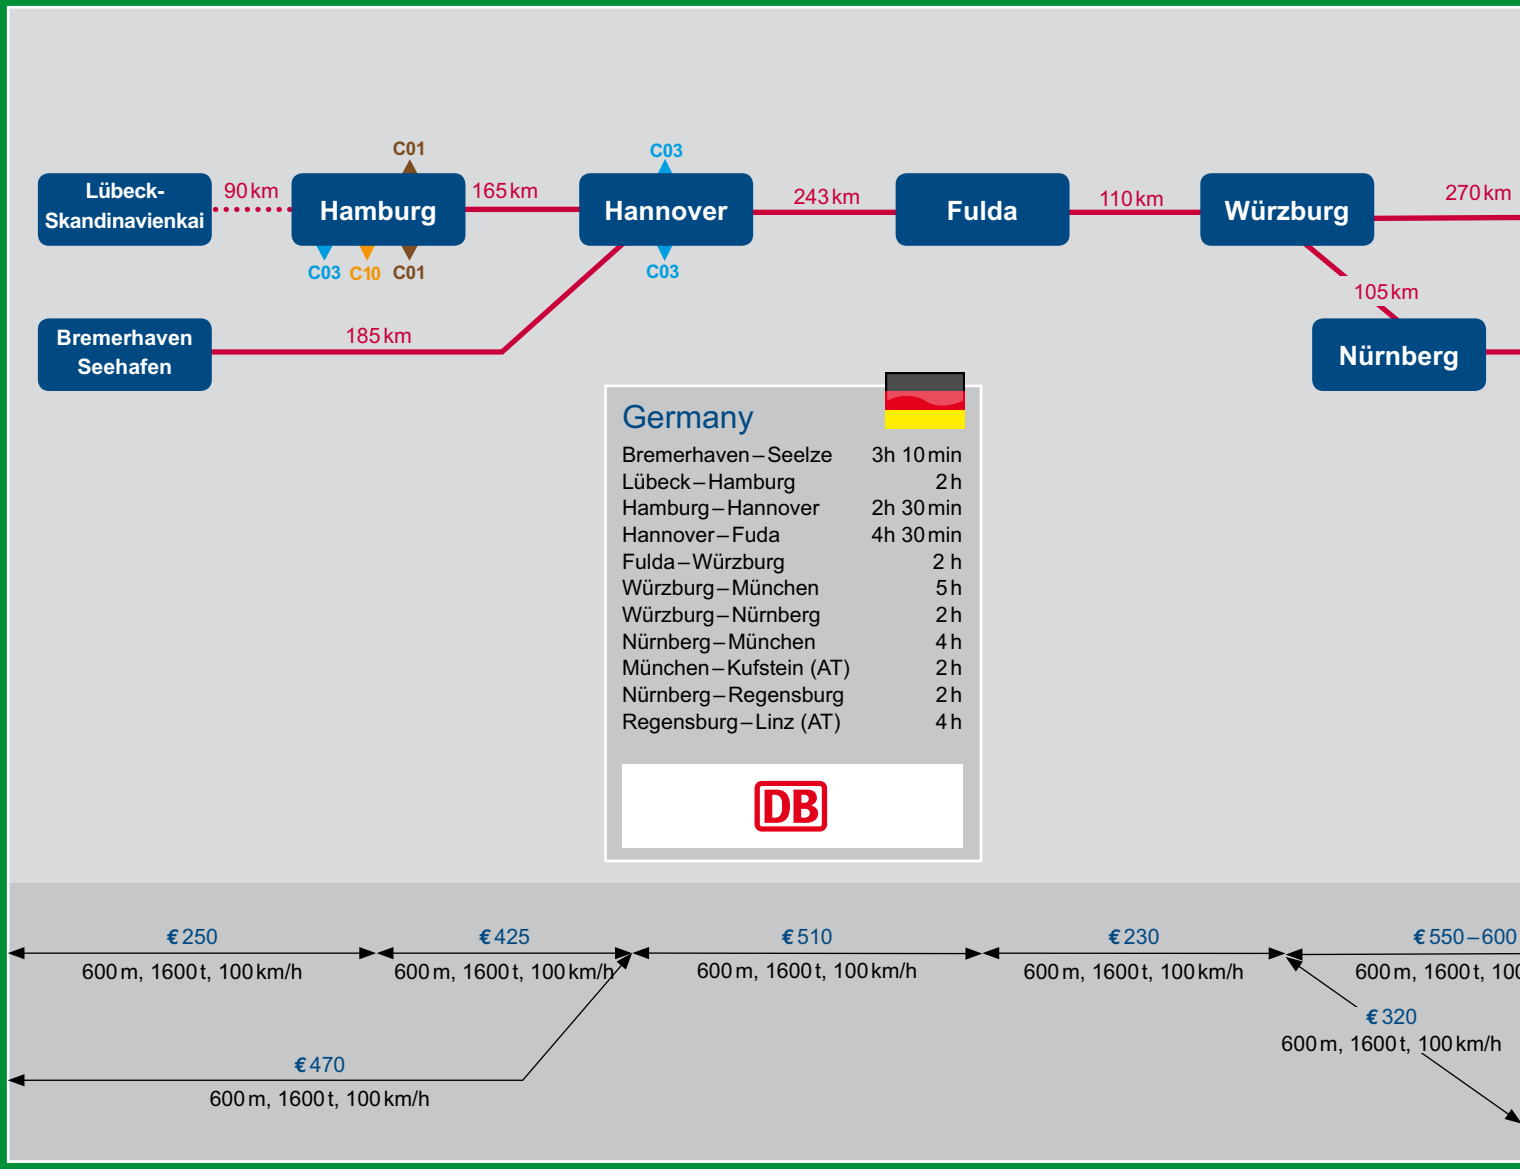
■ Hamburg/Bremerhaven – Würzburg – München/Passau – Wien/Salzburg – Verona

On RNE Corridors we:

- deliver a more reliable forecast of the available infrastructure to our customers
- apply the harmonized deadlines for planning international train paths
- shape corridor infrastructure capacity according to the market's requirements
- facilitate the capacity request procedure by providing pre-constructed international train paths
- improve train punctuality on the basis of regular performance monitoring

This will help our customers to plan their consignments more efficiently and thus become more competitive.

RNE CORRIDOR **C04** Hamburg/Bremerhaven–Würzburg–Münc



For detailed information on country and route characteristics:

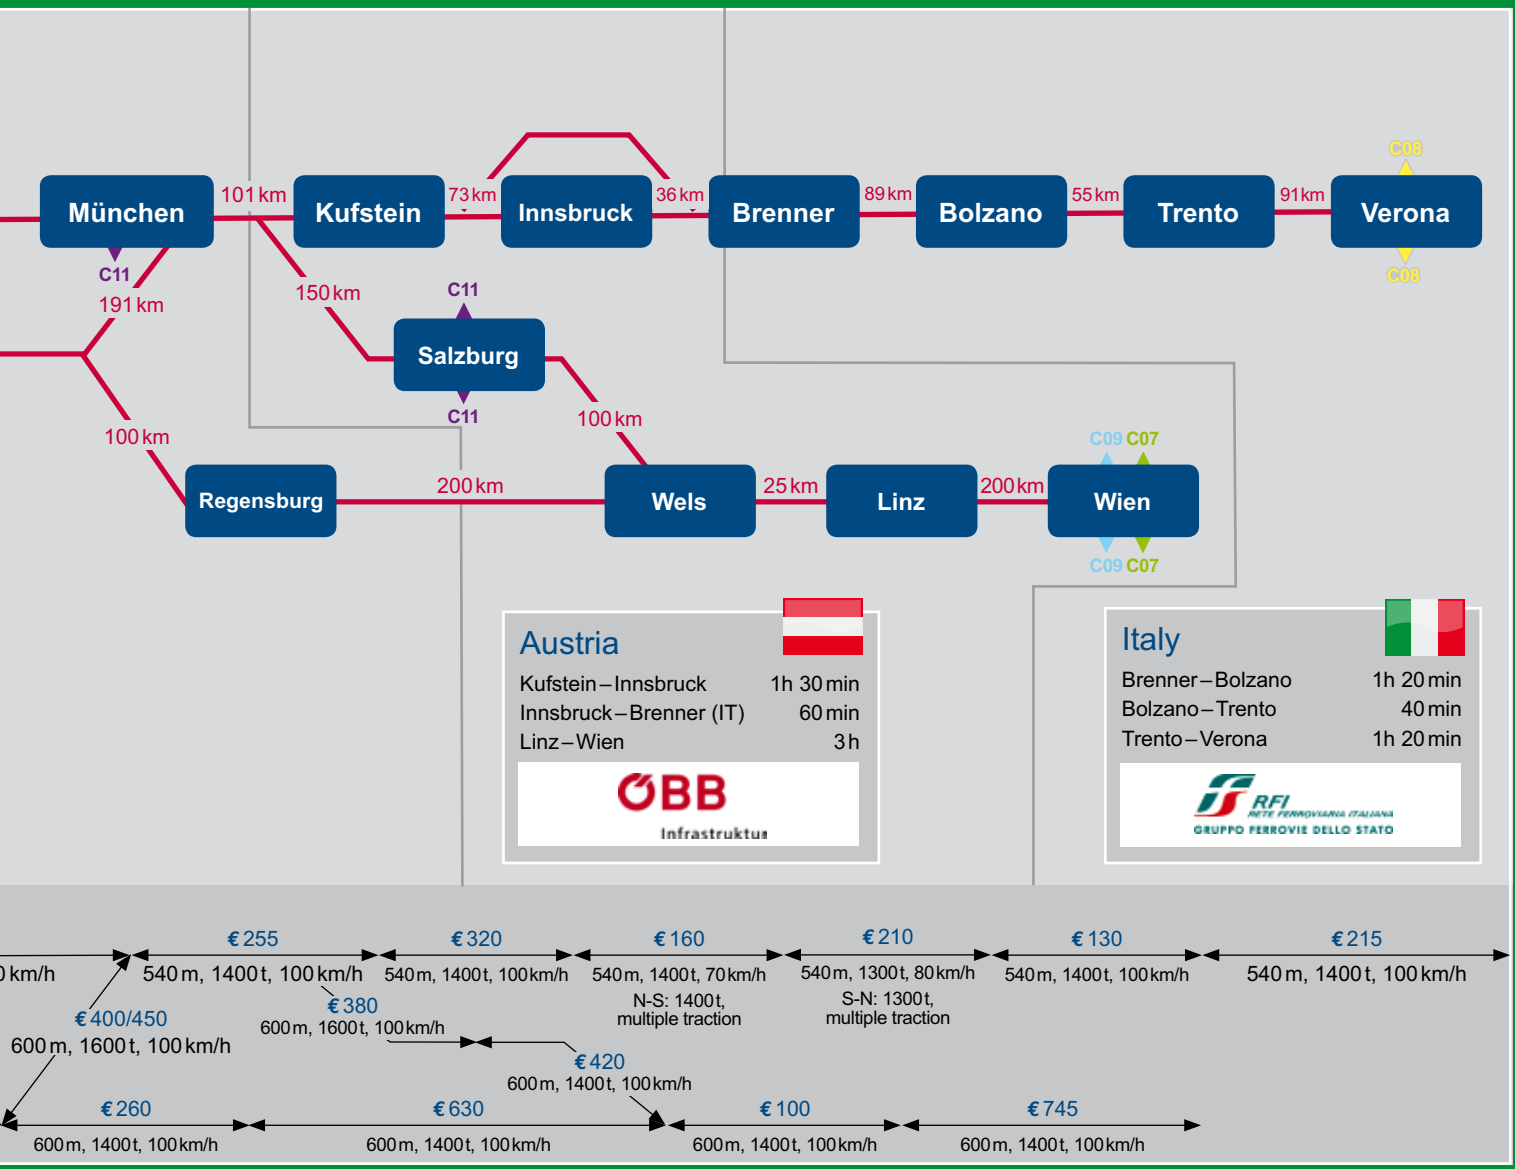
Edition 12/2009

hen/Passau – Wien/Salzburg – Verona



(ne) = non electrified / (pe) = partly electrified
If noting mentioned: electrified

The displayed path/train parameters, times and charges may differ in reality, as all calculated figures are average figures based on standard trains.The displayed train length comprises traction unit(s) in some Infrastructure Managers; in others, it doesn't.In border stations/on border sections, special operational regulations have to be applied. Please consult the IMs' Network Statements in any case!
