

Marking door-to-door luggage shipments (normal luggage, special luggage, bicycles)

In order to ensure that your shipment is not mixed up and can be assigned to you as the customer, it is necessary to mark each individual item of luggage (normal luggage, special luggage, bicycles) with an appropriate luggage slip.

Example of how to properly label a bicycle:

Slide the luggage slip into the address tag.

Attach the address tag to the bicycle's handlebar by swinging the strap around the handlebar.

Pull the address tag through the loop.

The address tag is now firmly attached, and the shipment is clearly marked.
